LeasePak Version 6.3a
MR5 Release Bulletin
July 28, 2011

LeasePak Version 6.3a MR5 Release Bulletin

Release 6.3a MR5

Discrepancies Fixed

Version	Build	Ticket	Description
6.30	3083	530565	Opening Multi Assets Maintenance form after selecting a booked application on Application menu gives run time error and closes the system.
6.30	3083	530566	When Allow Prop (PPT) value changes on pending assets, through application, the audit report is being ignored.
6.30	3082	529838	U0101: Book Lease only takes 10 co-lessees, 10 guarantors, or 10 user-defined clients. The API needs to be expanded to allow for up to 30 co-lessees/guarantors/udc (10 of each type).
6.30	3082	530556	U0230: Run time error, on selecting a lease that has been paid off.
6.30	3082	530564	Incorrect message in the U0230 Multi Asset Maintenance when a lease is paid off and all assets SOLD. Message = "Input Required."
6.30	3081	530545	U0230: Multi Asset Maintenance update - Modifying a single field for 200+ assets is taking a considerable amount of time to process.
6.30	3081	530547	U0230: Fixed several cosmetic issues with update.
6.30	3080	529592	U0230: Exporting exception report to excel is not working properly.
6.30	3080	529626	U0230: Incorrect error message appears "City/County/State combination does not exist" when the same city and/or GEO code is used but in a different jurisdiction.

Release 6.3a MR5

Discrepancies Fixed

Version	Build	Ticket	Description
6.30	3080	530460	(ANEC) When there is a large number of assets being updated in U0230, the following error message is received: "Error getting thread to connect to server. Contact your system administrator immediately."
6.30	3080	530535	U0230: Multi Asset Maintenance does not support LeasePak auditing.
6.30	3079	530437	The account list on the alternate lease summary is being sorted incorrectly.
6.30	3078	530351	API crashes with duplicate key error when co-lessee is added to an application with the total number of co-lessee in the input is less than the total number of lessee in the RGC table that are tied to that application.
6.30	3078	530386	EOP crashes in batch payments for new portfolio since RAS record never initialized.
6.30	3078	530435	Lease utility 231 crashes with segmentation fault error; SEGV.
6.30	3078	530486	Incorrect GL entries being produced when Acquisition Fee adjustment is performed via U0225 screen.
6.30	3078	530490	LinkIT API send/recv errors cause lpxmldrv to hang when network is congested.
6.30	3076	530434	The linkIT API is failing on adding UDT for Assets, and Application Assets.
