Release Bulletin

A full list of discrepancies fixed and enhancements delivered in this release are in the latest [Release Bulletin \(70a_release_bulletin_mr3.pdf\)](#).

Important Notices

i **Metro Framework Improved User Interface** *Build 5624*

This release begins major improvements and modernizations to the LeasePak client user interface using the Metro Framework (MFW). In addition to the improved interface, the MFW interface also allows the user to customize their experience through various display options available in Setup.

! New .NET Client, Oracle Server Platforms

[Return to Top](#)

Build 5587

The LeasePak client now features the .NET platform, providing updated user interface screens and controls. The procedure for upgrading to the new client has changed from previous versions.

New upgrade procedures are also in place for the LeasePak server, as well as installation and configuration procedures for Oracle Database 12c Release 1.

- [LeasePak Client](#)
- [LeasePak Server → LeasePak Upgrade and Conversion](#)
- [LeasePak DBMS Server → Oracle 12cR1 Server](#)

! New sudoers File Procedure

Build 5587

Starting with RH6, the administrator should add a file with the required sudo permissions to the `/etc/sudoers.d` directory instead of editing the `/etc/sudoers` file directly.

- [LeasePak Server Preparation and Installation → Linux Preparation](#)

i Documentation Removed from Docsuite for Unavailable Functionality

Build 5587

The following areas of functionality are not currently available, and their related documentation has been removed:

- [U0801 Application → Credit Scoring](#)
- [U0801 Application → Import Pricing](#)

Functionality for Capital Cost Allowance (CCA) continues to be unavailable as in previous versions and is also not currently documented.

Database Changes

No changes were made to the LeasePak database for this release.

For the full listing of LeasePak 7.0a database objects, refer to the [Database Reference](#).

Enhancements

Sorted by ticket number, ascending. For enhancements delivered specifically in this release (if any), refer to the [Release Bulletin \(70a_release_bulletin_mr3.pdf\)](#). For a cumulative listing of enhancements in this or previous LeasePak versions, refer to the [Release Notes Archive](#).

538990 Recurring Charges – Accrual Basis

Build 5624

[Return to Top](#)

Requires Accrual Basis Recurring Charges module: This enhancement adds a new functionality of Accrual Basis Recurring Charges module to allow recurring charges to be accounted for on an accrual basis. As all recurring charges today are accounted on cash basis, in this enhancement, LeasePak supports accrual basis accounting for RCR, if new module Accrual Basis Recurring Charges is part of users license file.

539589 U0449A and U0449D Use Tax Disbursal XML Files

Build 5624

This enhancement adds two new XML reports for U0449A and U0449D Use Tax Disbursal update. LeasePak provide XML version of data files for U0449A - Use Tax Disbursal Location Listing, and U0449D - Non Rpt Use Tax Disbursal – Location reports with same data as in ASCII reports generated today. The XML data files will be generated as part of the update U0449A & D - Use Tax Disbursal update during end of month processing. These two XML data files will be stored in LeasePak `$udata` data directory.

- [U0449 Use Tax Disbursal](#)

537731 Refactor R0502 and R0905 and XML Conversion

Build 5587

Adds XML versions of R0502 Application Inquiry and R0905 Lease Inquiry reports.

- [R0502 Application Inquiry](#)
- [R0905 Lease Inquiry](#)

538756 API – Lessee Additional Fields

Build 5587

Enhances the existing API classes and methods to better mimic U0203 Lessee functionality.

- [MsiSppExtractor](#) → [extractLessee](#)

538757 API – Guarantor Additional Fields

Build 5587

[**Return to Top**](#)

Enhances the existing API classes and methods to better mimic U0217 Guarantor functionality.

- [MsiAppExtractor](#) → [extractGuarantor](#)

538758 API – Customer Additional Fields

Build 5587

Enhances the existing API classes and methods to better mimic U0205 Customer functionality.

- [MsiAppExtractor](#) → [extractCustomer](#)

538759 API – Vendor Additional Fields

Build 5587

Enhances the existing API classes and methods to better mimic U0201 Vendor functionality.

- [MsiAppExtractor](#) → [extractVendor](#)

539240 New U0201 Vendor Web Service

Build 5587

Provides a new web service to add, update, delete, and retrieve the Vendor record with all related information from associated child tables.

- [LPVendor](#)
